

Chair for Network Architectures and Services—Prof. Carle
Department of Computer Science
TU München

Discrete Event Simulation

IN2045

Dipl.-Inform. Alexander Klein

Dr. Nils Kammenhuber

Prof. Dr.-Ing Georg Carle

Chair for Network Architectures and Services

Department of Computer Science

Technische Universität München

Technische Universität München

Teaching – I8 Overview

□ Lectures

SS:

- Introduction to Computer Networking and Distributed Systems (IN0010)
- Peer-to-Peer-Systems and Security (IN2194)
- **Discrete Event Simulation (IN2045)**

WS:

- Master Course Computer Networks (IN2097)
- Network Security (IN2101)

□ Seminars

- Seminar – Network Architectures and Services: Network Hacking (IN0013)
- Advanced Seminar – Innovative Internet Technologies and Mobile Communications (IN8901)
- Advanced Seminar – Future Internet (IN8901)
- Advanced Seminar – Sensor Networks (IN0014), with Prof. Baumgarten

□ Lab Courses

- Bachelor Practical Course – Internet Lab (IN0012)
- Master Practical Course – Computer Networks (IN2106)

Course organization IN2045 Discrete Event Simulation

- Lecture
 - Wednesday 14:15–15:45, FMI 03.07.023 (starting Wed 25 May 2010)
 - Block course, ca. 3 days between 20–24 September 2010
- Students are requested to subscribe using a Web form at www.net.in.tum.de ⇒ Lehre ⇒ Vorlesungen ⇒ ...
 - <http://www.net.in.tum.de/de/lehre/ss10/vorlesungen/>
 - Will be used for sending up-to-date information (e.g., room changes)
 - Email list for subscribers of course
 - **Unrelated to subscription in TUMonline!**
- Questions and Answers / Office hours
 - Dipl.-Inform. Alexander Klein, klein@net.in.tum.de, 03.05.061
Office hours: Mon 13–14
 - Dr. Nils Kammenhuber, kammenhuber@net.in.tum.de, 03.05.043
Office hours: usually Thu, Fri 14–15, but check via e-mail first
 - Prof. Dr. Georg Carle, carle@net.in.tum.de
Office hours: Upon appointment (typically Mon 16–17)
- Course Material
 - Slides are available online. Slides may be updated during the course.

Grading

- ❑ Course is 4 ECTS
 - 2 SWS lectures
 - 1 SWS exercises
- ❑ Exercises
 - Prepare for the oral examination
 - Successfully participating at exercises gives a bonus of 0.3 on the overall grade. [Exercises = same time slot as lecture.]
- ❑ Our concept for grading
 - Final examinations will be oral and give an individual grade.
 - You must pass the oral exam for being successful in the course (i.e., 4.3 and 0.3 bonus \neq 4.0)
- ❑ Subscription in TUMonline
 - Warning: Subscription on www.net.in.tum.de does not replace subscription via TUMonline!
 - Deadline: ca. 20 Sep 2010

Questions

- Who studies what?
 - Diploma degree?
 - Master in Informatics?
 - Master in Information Systems [Wirtschaftsinformatik]?
 - Other Master courses?
 - Bachelor in Informatics?
 - Exchange students from other universities?
- Which previous relevant courses?
 - Rechnernetze/Computer networks?
 - Masterkurs Rechnernetze/Master course computer networks?
 - Grundlagen Betriebssysteme/Operating Systems?
 - Other courses, e.g., Simulation and Modelling?

Course outline (tentative)

1. Introduction

- Motivation: When and why to do simulation
- Types of simulation
- Event-driven simulation
- Process-oriented simulation
- Typical Work Flow Elements
- A simple queuing model; some queuing theory

Introduction

Simulation vs. Analysis

ISO / OSI

7	Application	VoIP, Video, FTP, HTTP, P2P, ...	
6	Presentation		
5	Session		
4	Transport	TCP/UDP	
3	Network	Internet Protocol (IP)	
2	Data Link	Medium Access Protokolle Ethernet, WLAN,...	} IEEE 802
1	Physical	Physikalische Bit Übertragung	

Course outline (tentative)

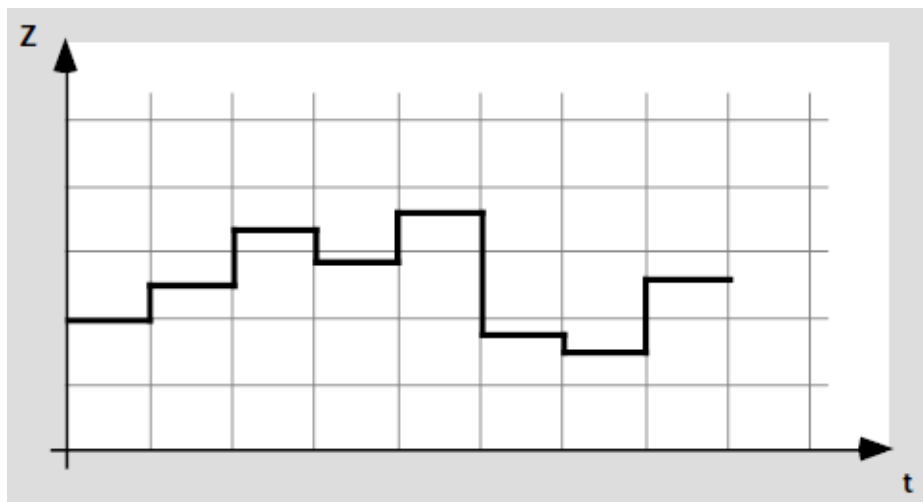

2. Statistics fundamentals
 - Contents shall be embedded into practical context
 - Basics and descriptive statistics (mean, variance, moments)
 - Discrete vs. continuous random variables
 - Visualization
 - Probability distributions and their properties

Statistics fundamentals

Continuous

Discrete

Dr. Joachim Warschat – Universität Stuttgart

Course outline (tentative)

3. Random numbers
 - How to generate a desired probability distribution
 - [pseudo-] Random number generators
 - Evaluation of random number generators

Random number generator

Example:

00101110101001101100010011101010100011
0010111010100110110001001110101010001
1

Random

Autocorrelation Lag 4

Course outline (tentative)

4. Tools

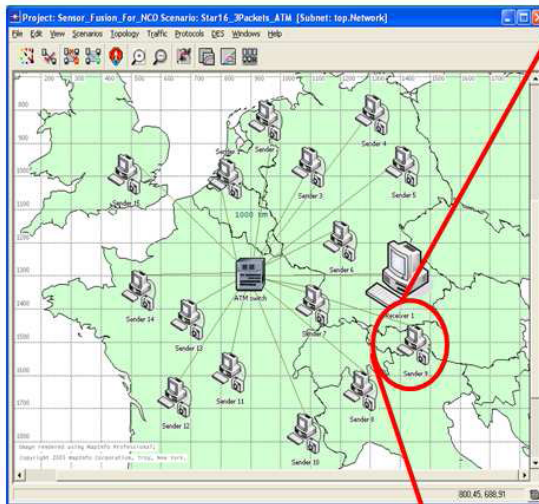

OPNet

Matlab

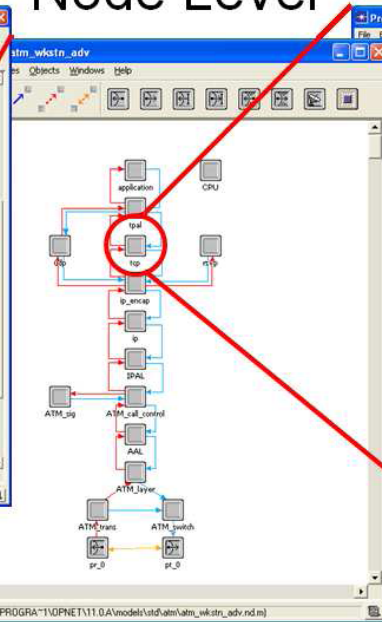

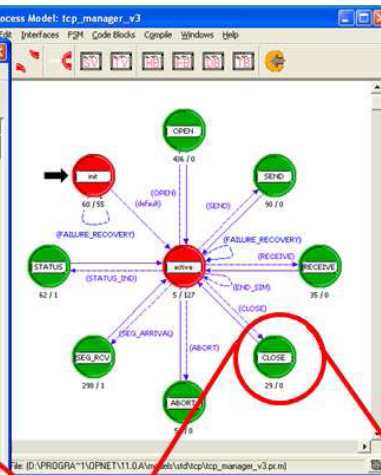

Network Level

Node Level

Process Level

Code Level

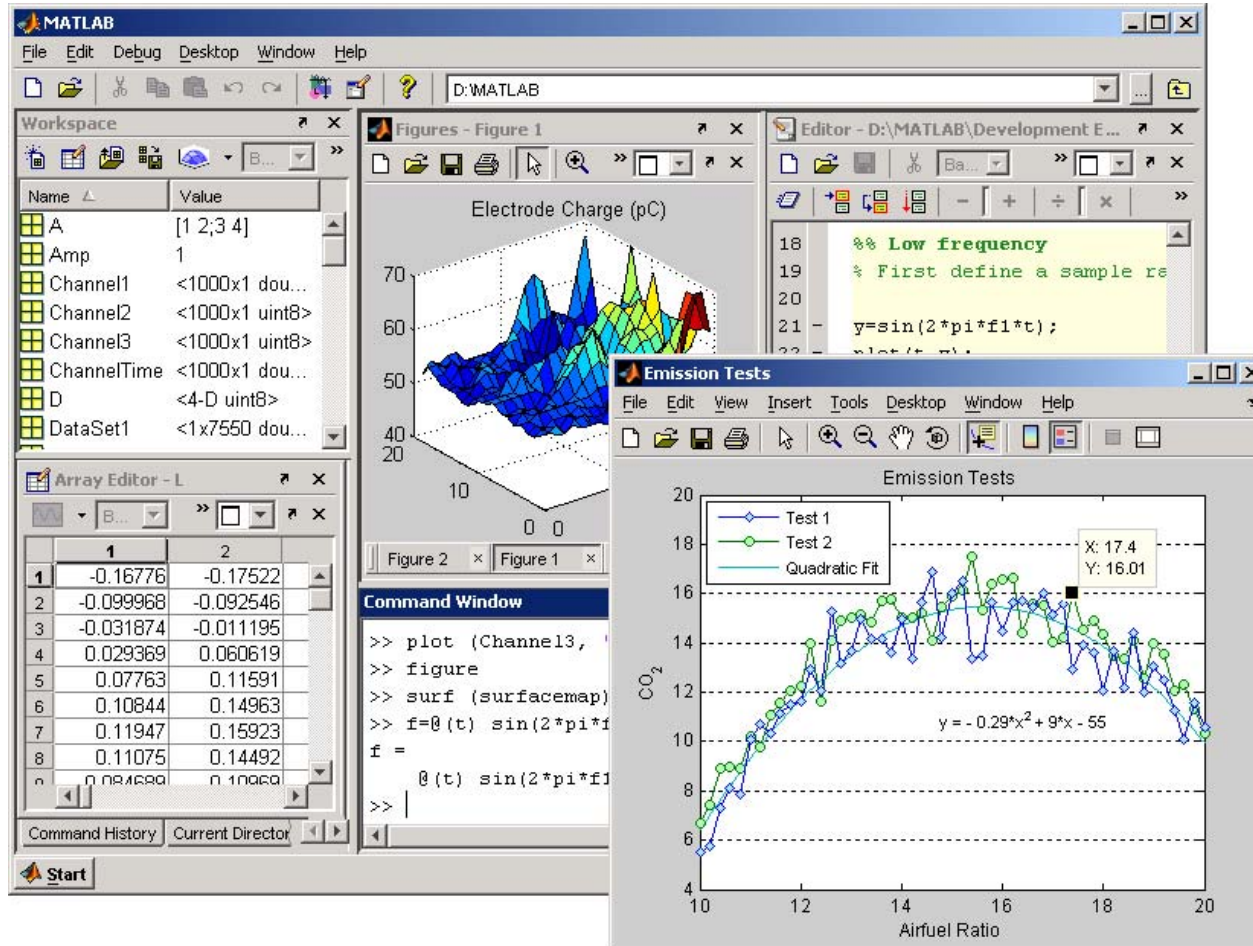

```

tcp_manager_v3 : CLOSE : Enter Execs
1  IF (op_tci_attr_get (tci_ptr, "conn_id", &conn_id) == OPC_COMPCODE_F
2  op_ptr->log_entry_write (1, loghdl,
3  "TCP CLOSE failed - unable to get connection ID from con
4  IF (op_tci_attr_get (tci_ptr, "local_key", &local_key) == OPC_COMPCODE
5  op_ptr->log_entry_write (1, loghdl, "TCP CLOSE failed - unable t
6  /* Find a matching TCP socket process. */
7  tcb_ptr = tcp_tcb_from_id (tcp_ptr->conn_id, conn_id, local_key);
8  IF (tcb_ptr != OPC_NIL)
9  {
10 {
11     ev_ptr->event = TCP_EV_CLOSE;
12     if (op_ptr->invoke (tcb_ptr->conn_pro, ev_ptr) == OPC_COMPCODE_FA
13     op_ptr->log_entry_write (1, loghdl,
14     "TCP CLOSE failed - unable to invoke TCP socket proc
15 }
16 else
17 {
18     if (tcp_trace_active)
19     {
20         sprintf (msg0, "CLOSE command issued to invalid connection (
21         op_ptr->obj_print_major (msg0, OPC_NIL);
22     }

```

Matlab

<http://www.mathworks.de/>

Course outline (tentative)

5. Experiment planning
 - Factorial design
 - Factor analysis, ANOVA

Factorial design

Problem:

- ❑ Large number of parameters
- ❑ No detailed knowledge of the impact of the parameters

Idea:

- ❑ Variation of simulation parameters (valid configurations)
- ❑ Evaluation of the system performance
- ❑ Identification of the impact of each parameter on the system performance

Simulation / Parameter	X1	X2	X3	X4	Result (X1.X2.X3.X4)
# 1	+	-	-	+	38
# 2	0	+	+	0	12
# 3	-	0	-	+	43
# 4	-	+	+	+	12
# 5	-	-	-	-	15
# 6	0	0	0	0	8

Result Table

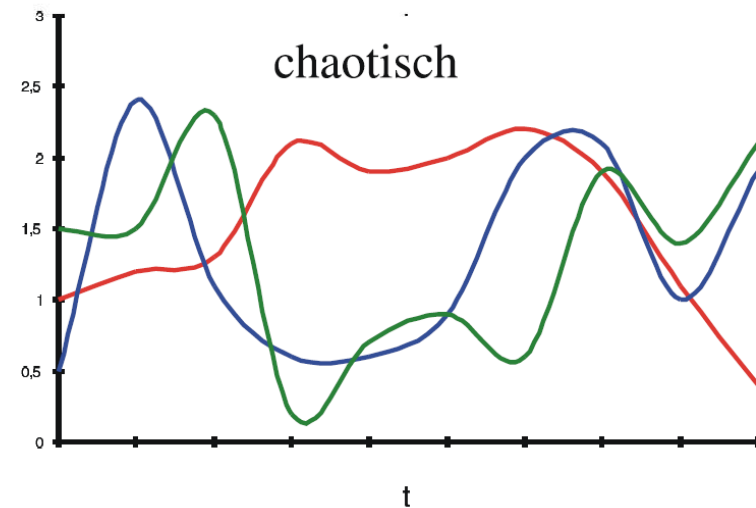

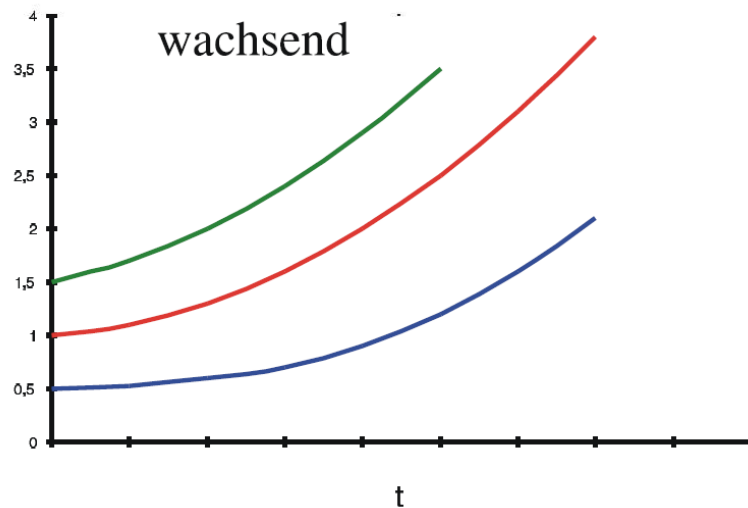

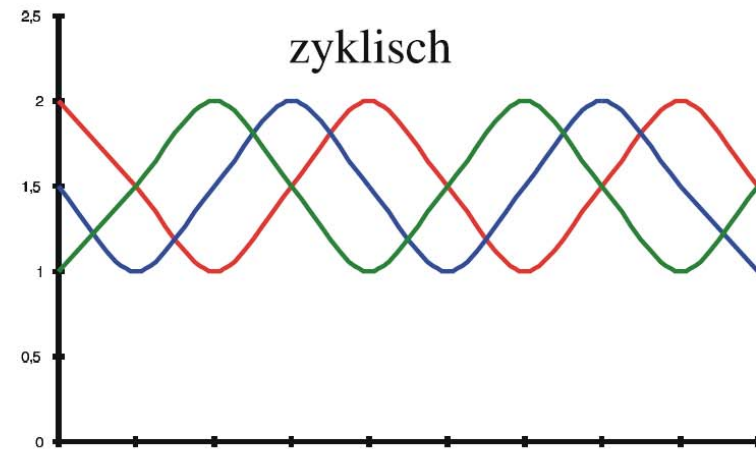

Course outline (tentative)

6. Evaluation of simulation results: More statistics 😊
 - Variability reduction
 - Confidence intervals
 - Visualization
 - ...

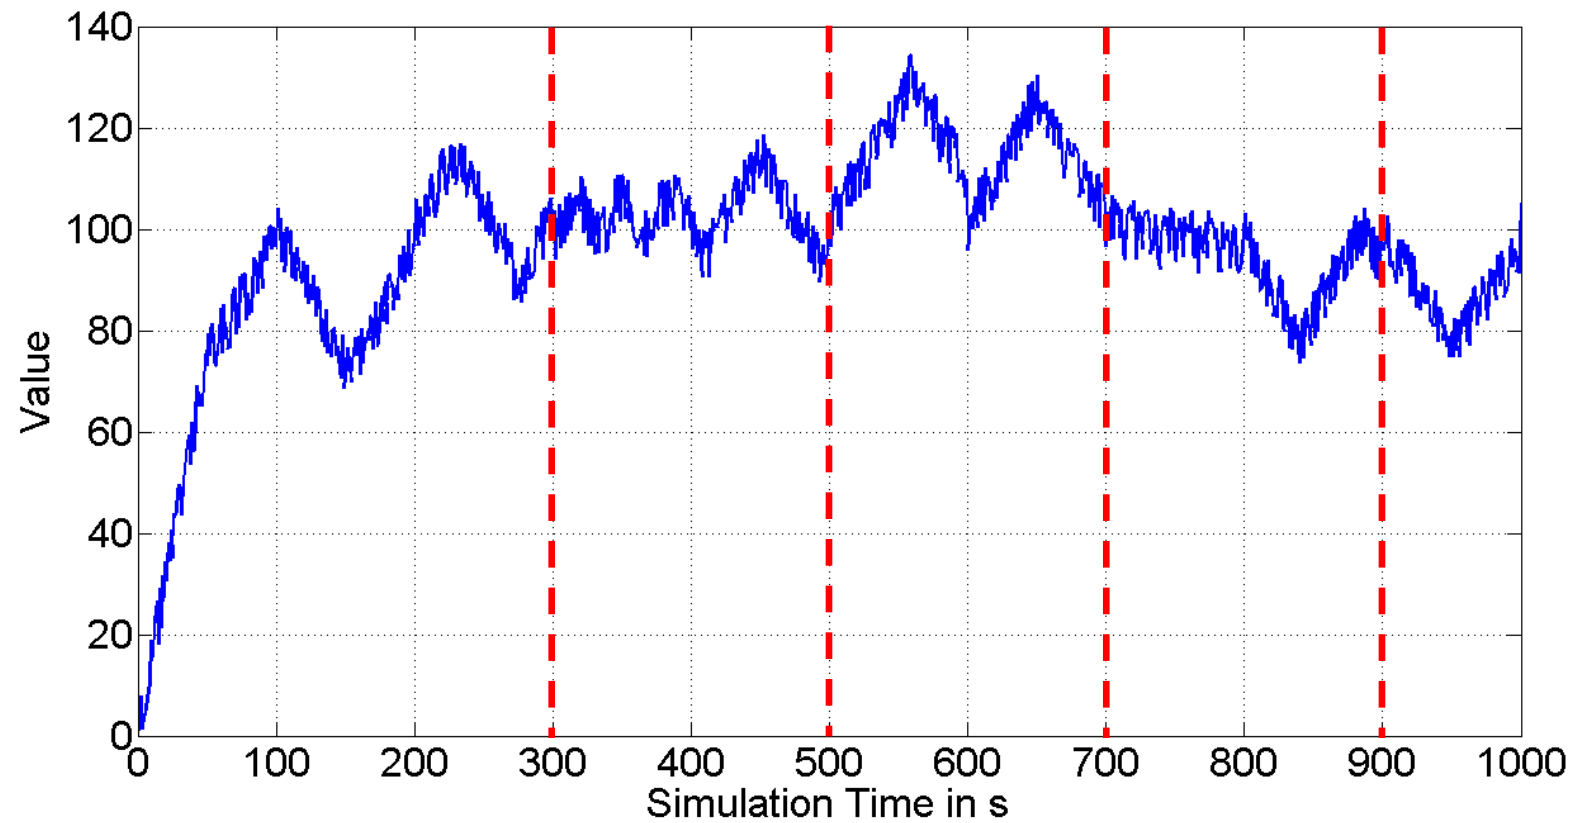

Stochastic processes: taxonomy

Batch Means

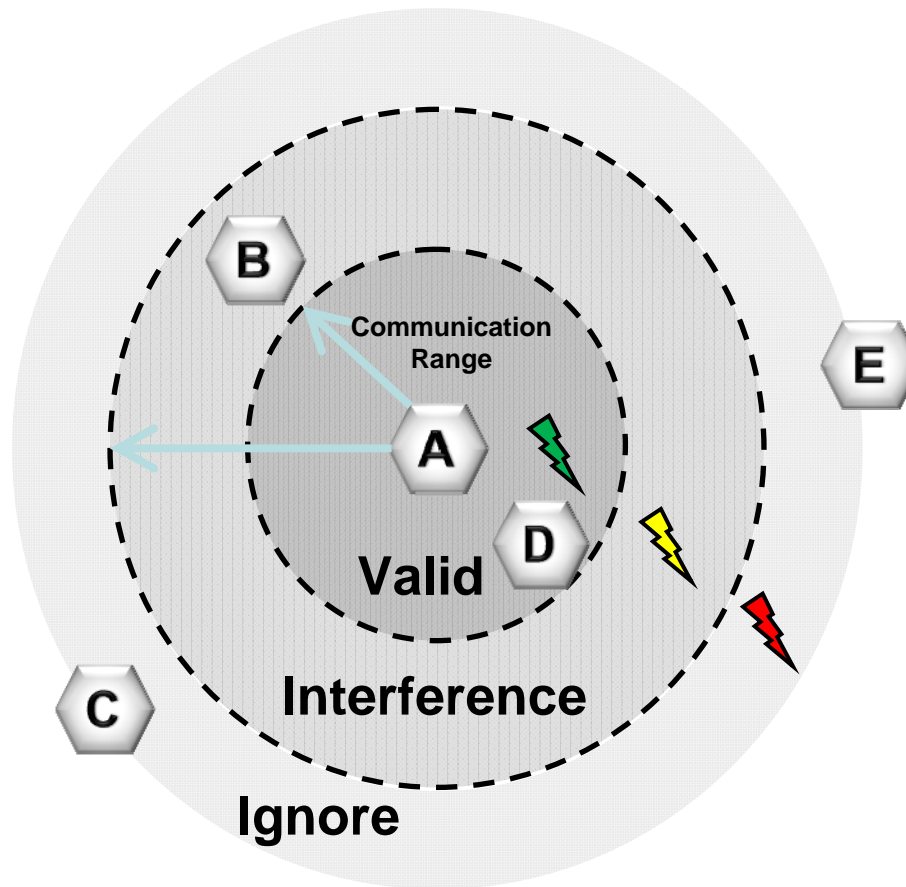

Course outline (tentative)

8. Tips and tricks from practice
 - What constitutes a good network simulator
 - How to set up a good simulation
 - How to do a good analysis of simulation output
 - How to lie with statistics
 - How to speed up your simulation

Course outline (tentative)

- Example:
 - Wireless Communication (Disc Model)

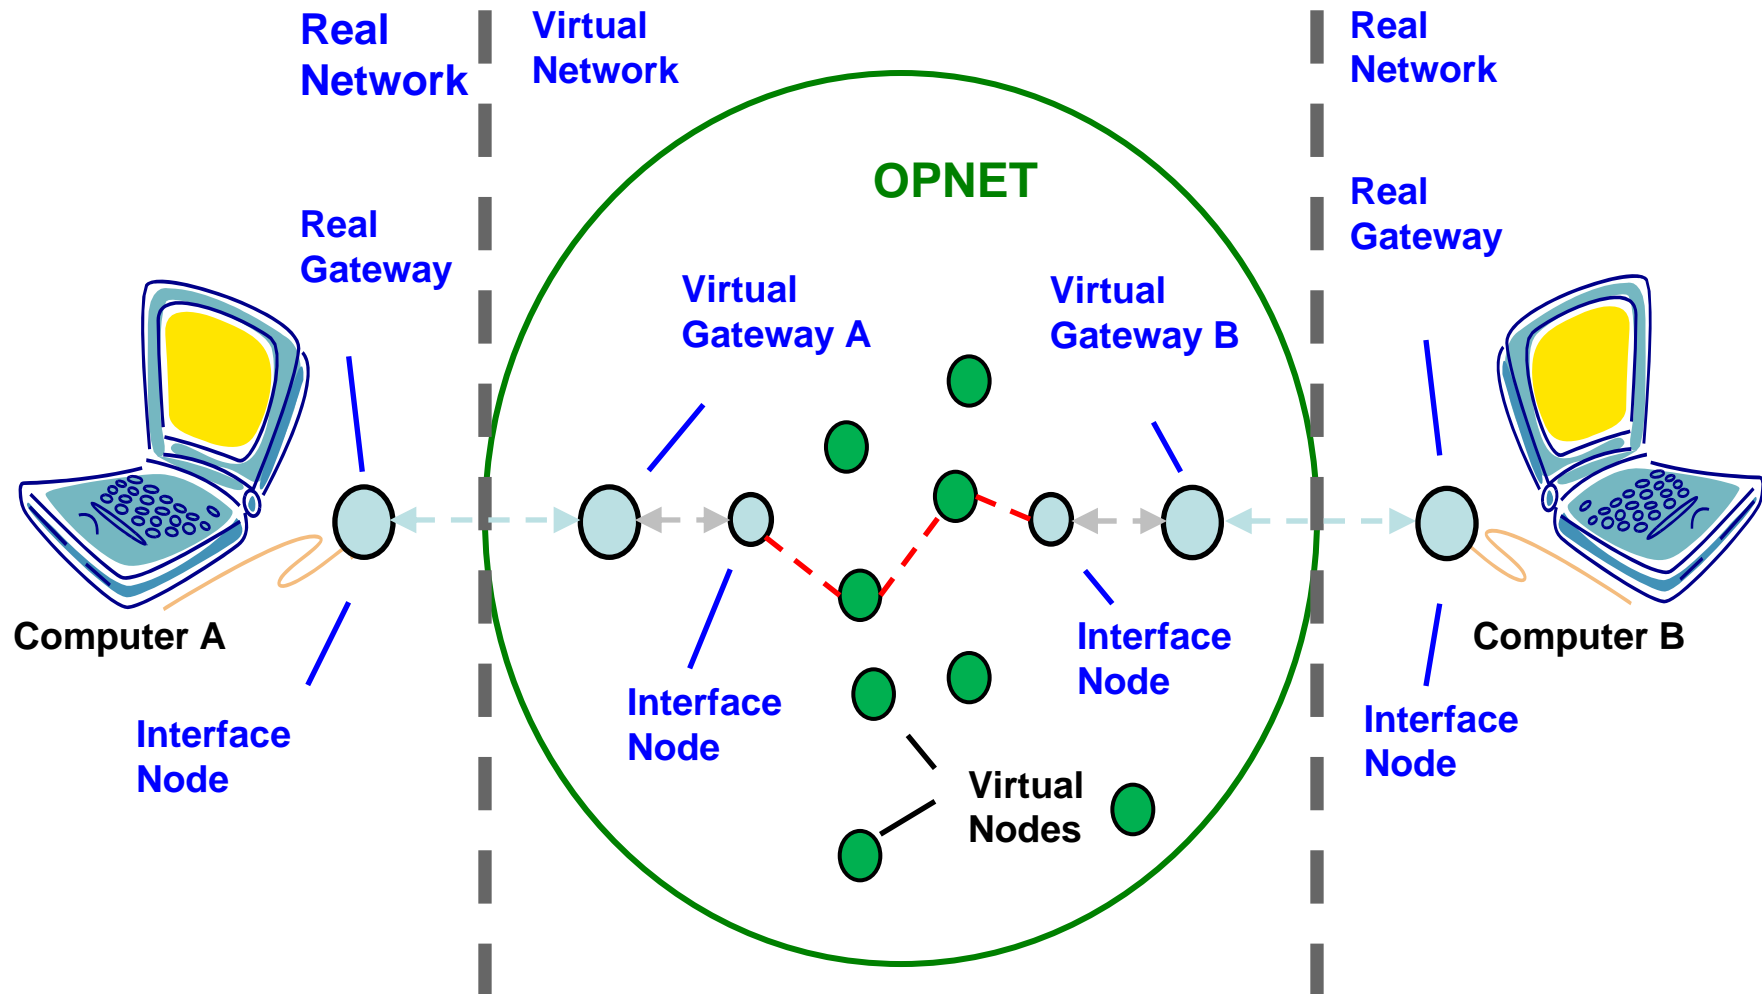

Course outline (tentative)

9. Advanced topics
 - Mobile networks, mobility models
 - Co-Simulation / Parallel simulation
 - Hardware-In-The-Loop Simulation

Advanced topics

Hardware-In-The-Loop-Simulation

Material

- ❑ Book:
Simulation Modeling and Analysis
Averill M. Law
4th edition
McGraw-Hill, 2007

- ❑ Lecture notes:
 - Parallel and Distributed Simulation Systems
Richard Fujimoto
College of Computing, Georgia Institute of Technology
 - Modellgestützte Analyse und Optimierung
Peter Buchholz, Informatik IV, TU Dortmund
 - Simulation of computer systems and computer networks:
A process-oriented approach
J. B. Sinclair, Rice University
 - Einführung in die Simulationstechnik
Frank Wagner, Joachim Warschat, Universität Stuttgart
