

## Introduction

# Technologies and Components for Smart Spaces

Prof. Dr.-Ing. Georg Carle

Prof. Dr.  
Georg Carle

Dr. Nils  
Kammenhuber

Dirk  
Haage

Michael  
Herrmann

Holger  
Kinkelin

Ralph  
Holz

Tobias  
Bandh

Andreas  
Müller

Dr. Alexander  
Klein

Dr. Ali  
Fessi

Stephan  
Günther

Lothar  
Braun

Johann  
Schlamp

Dr. Heiko  
Niedermayer

Dr. Christian  
Grothoff

Philipp  
Fehre

Marc-  
Oliver  
Pahl

Nathan  
Evans

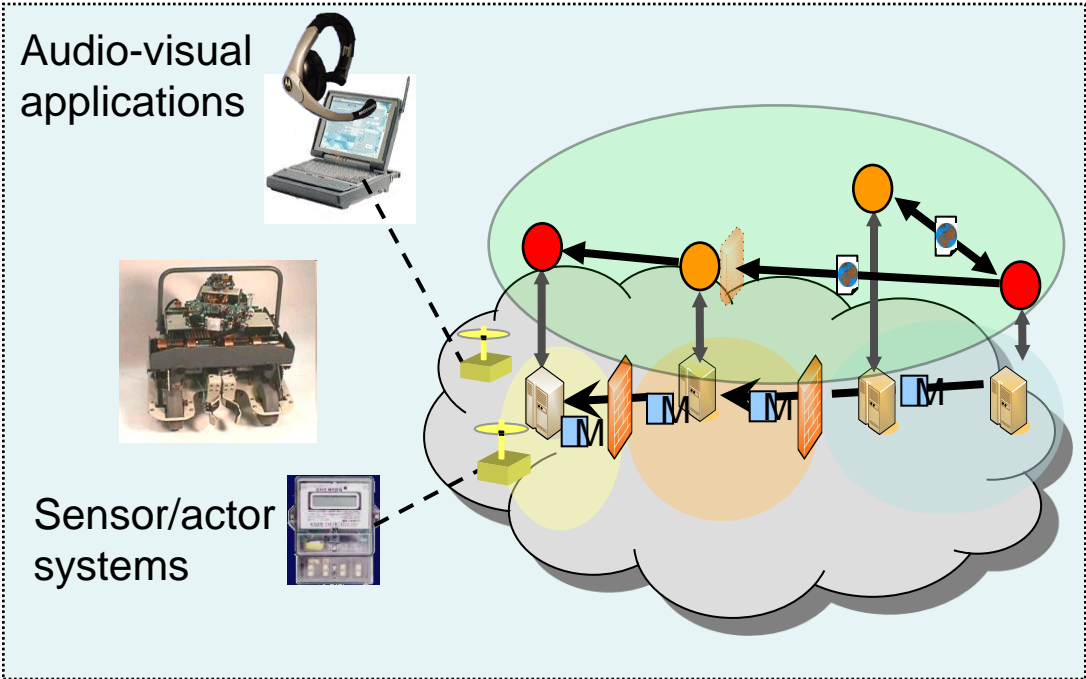

Corinna  
Schmitt

Matthias  
Wachs

Audio/video and real-time service	Autonomic management	Network security
Peer-to-peer and overlay Networks		
Mobile communications		
Network monitoring		

- Innovative mechanisms
- Measure and analyze the network
- Methods and tools for network engineering

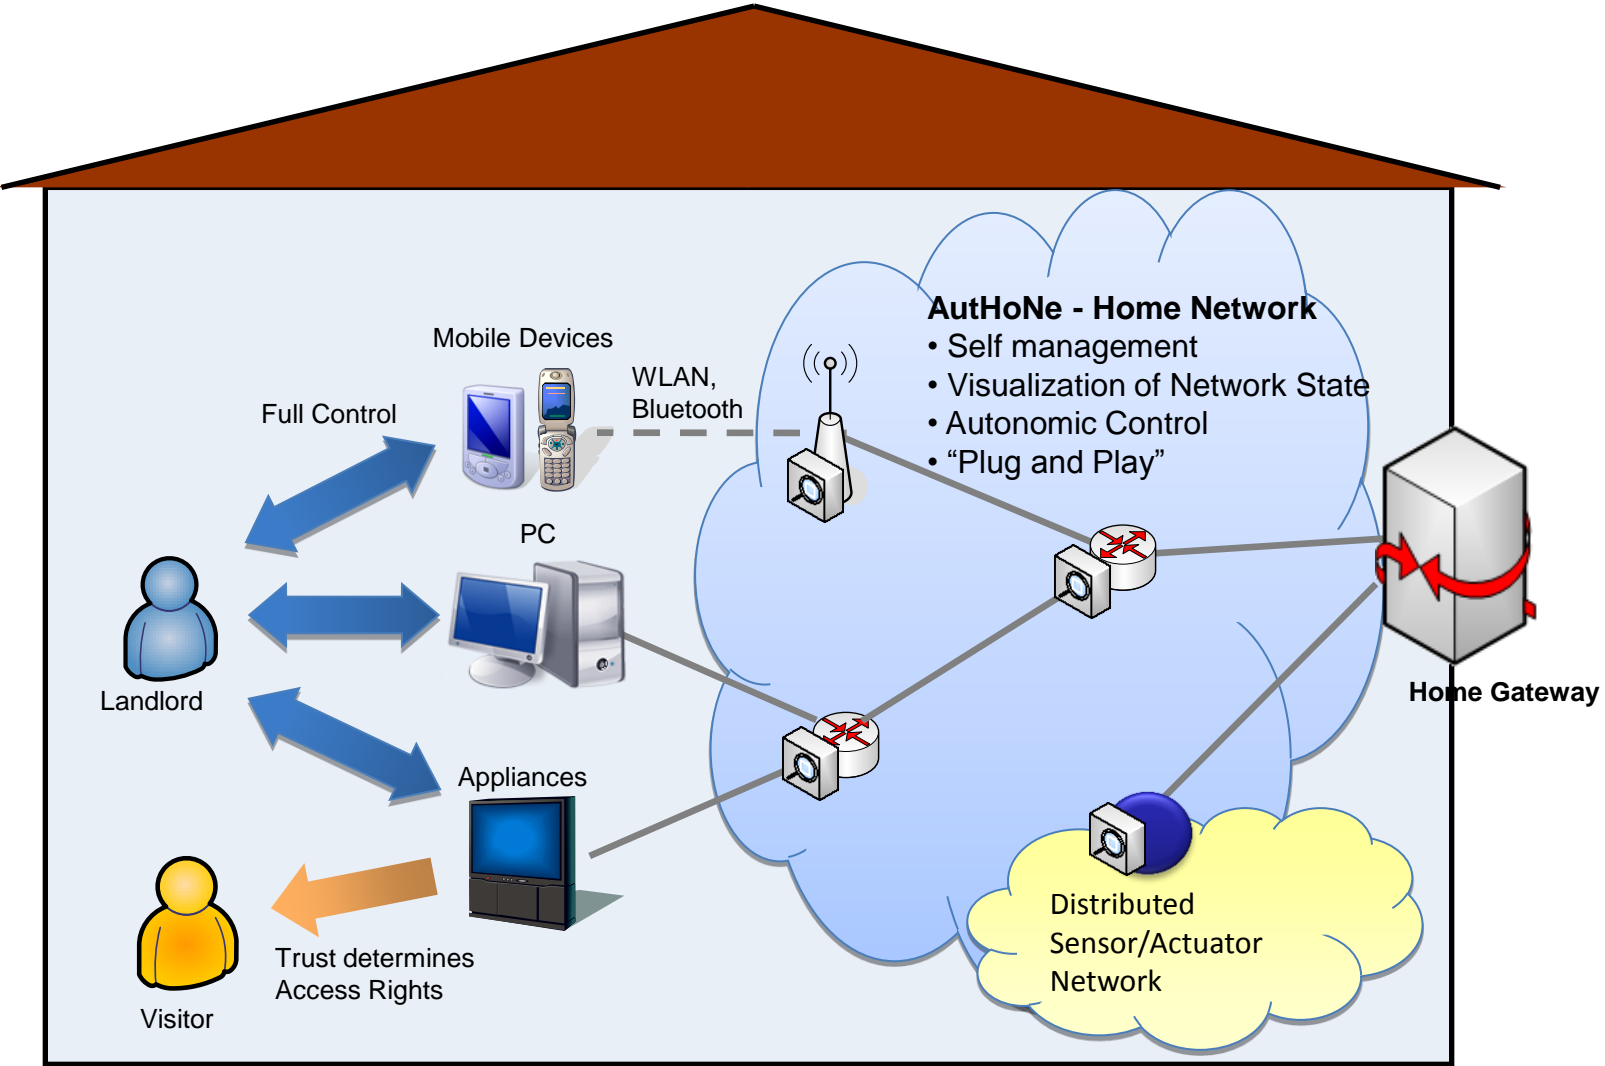

- Part of the European Celtic cluster within the EUREKA Initiative
  - German subproject funded by the BMBF
  
- German Consortium
  - Fraunhofer FOKUS
  - Siemens Corporate Technology
  - TU München
  
- EU/Celtic Partners
  - Ginkgo Networks, France
  - France Telecom, France
  - Paris 6 (UPMC), France
  - Lund University, Sweden
  - Sony-Ericsson, Sweden

Bundesministerium  
für Bildung  
und Forschung

# Vision of a Secure Autonomic Home

## Home Networks Today

- ❑ Social and technological barriers
- ❑ No interconnection of devices
- ❑ Just used to access the Internet

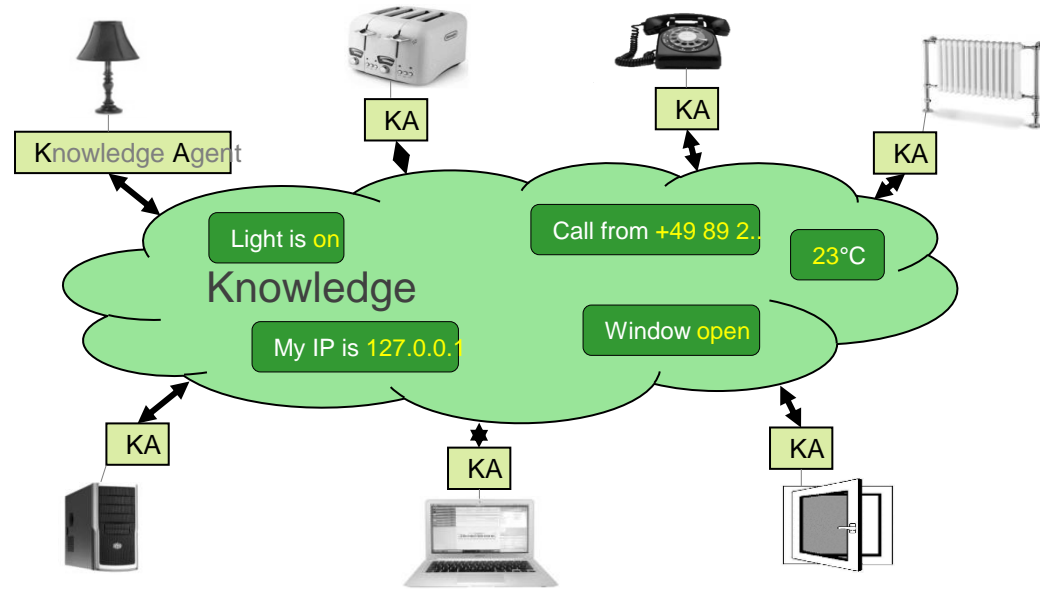

## AutHoNe

- ❑ Introduction of autonomic behavior
- ❑ Self-management and manual interaction
- ❑ Adapt devices and services to users and environment

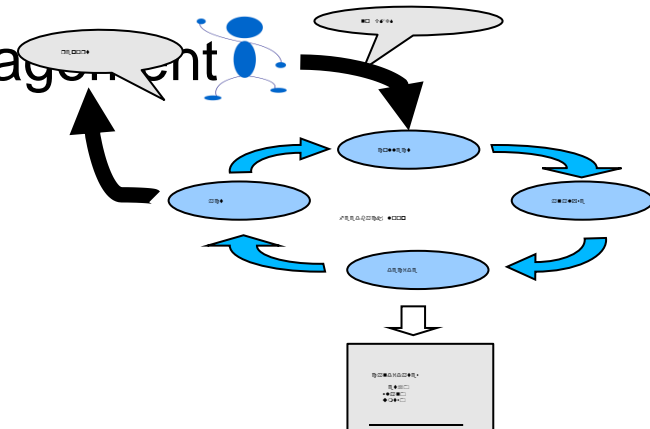

Degree of freedom for the Autonomic Network Control

## □ Knowledge Platform

## □ Autonomous Configuration and Management

## □ User Control

- User-friendly
- Modes for normal users and experts

- No remote access
- Remote access by owner (no administrative control) ...
- Remote access by friends ...

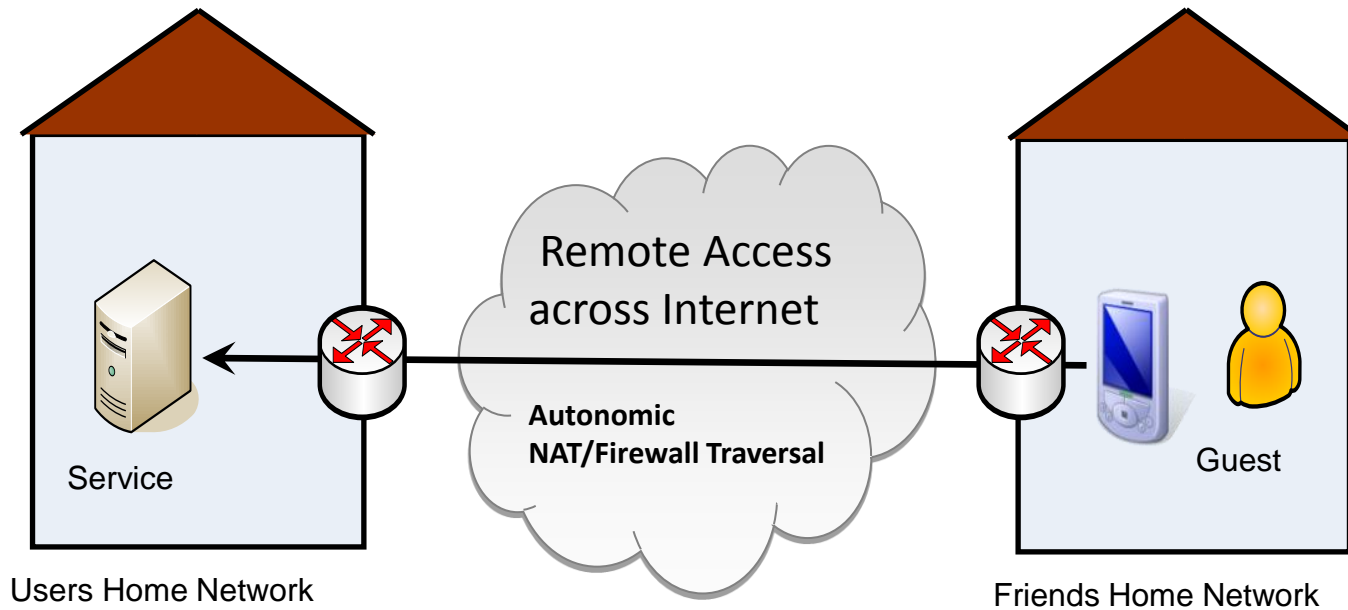

## □ Interaction with Environment

- Sensors
- Actuators

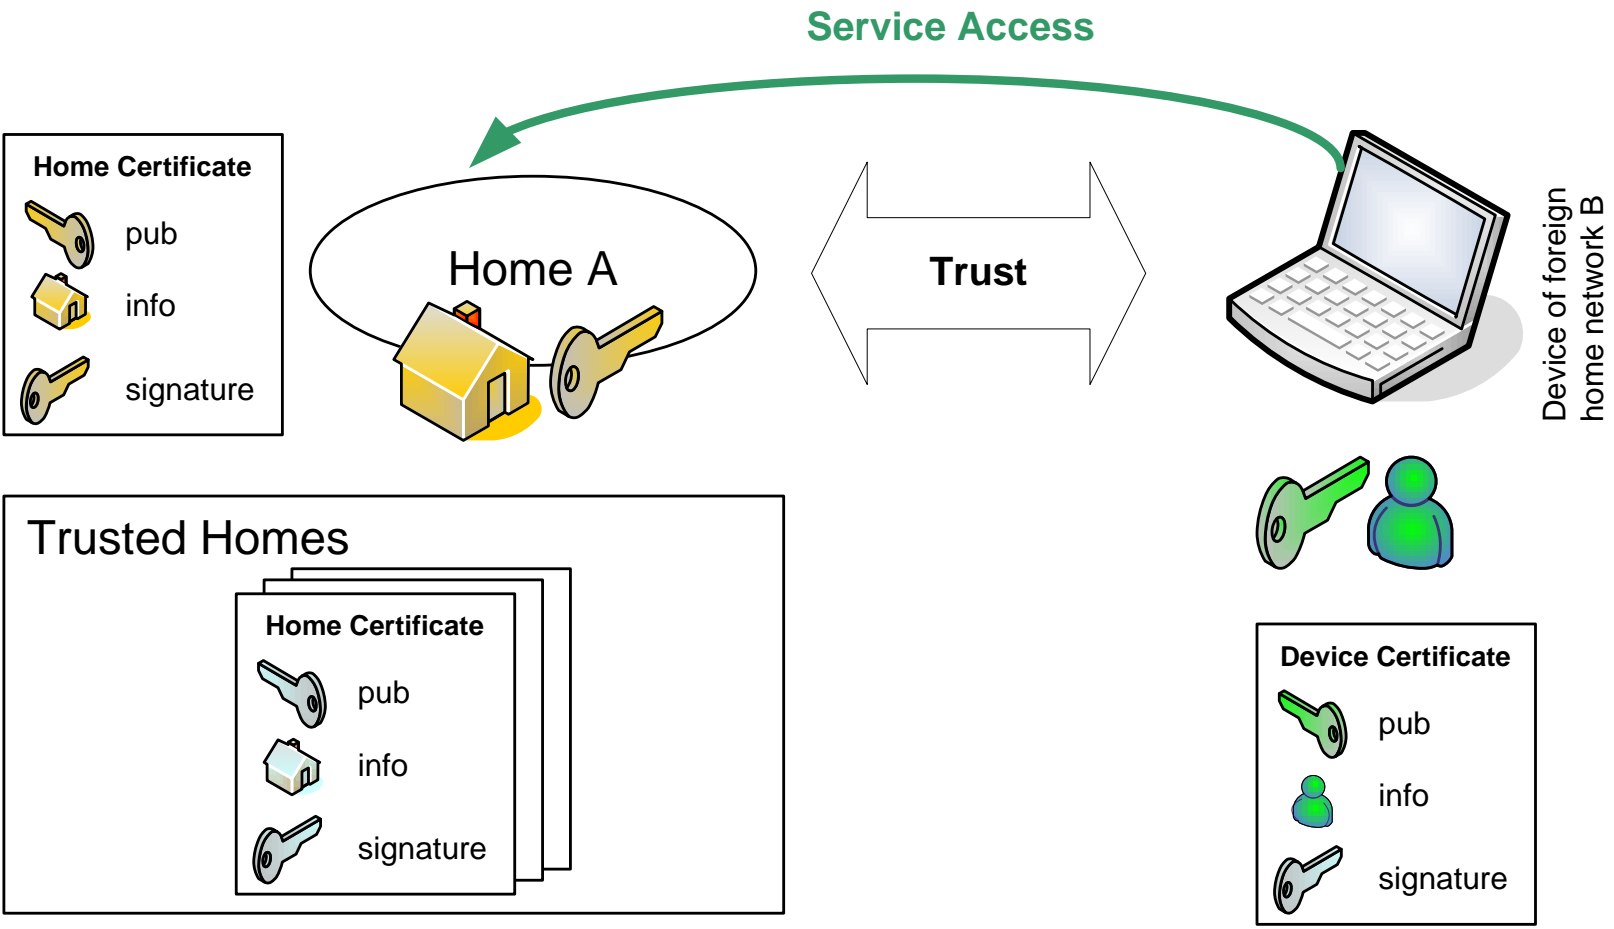

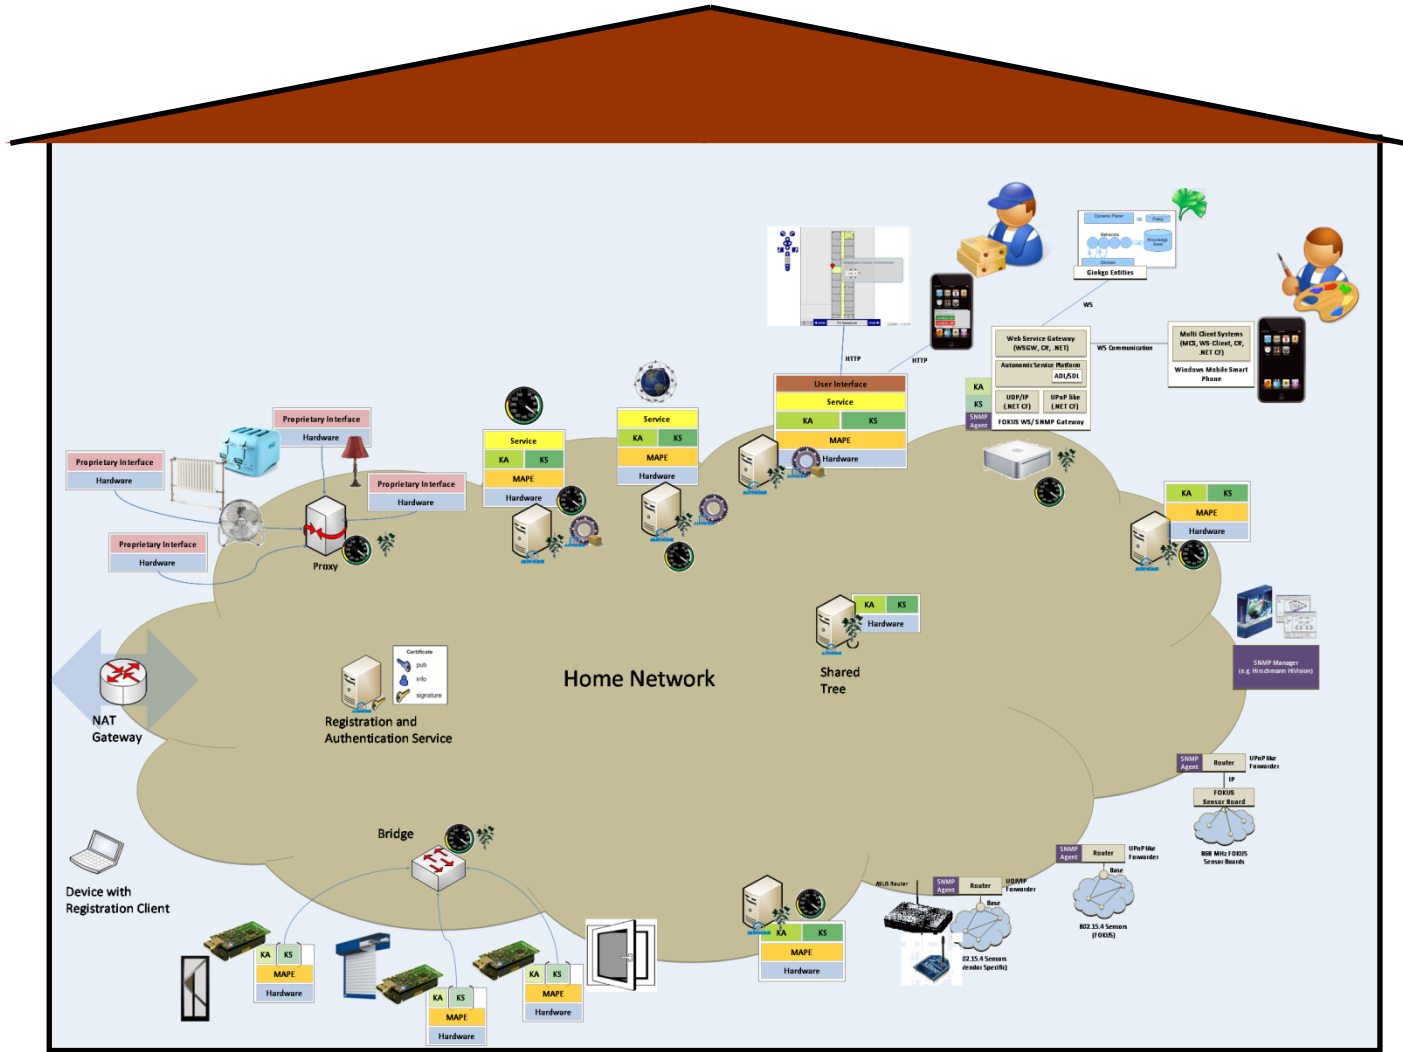

# Scenario: Remote Service Access

# Scenario: Trust and Security

# Architecture – Heterogeneous Devices

# Architecture – Multiple Buildings

**Thank you**  
for your attention!
